SECTION 1
AEMA: AN OVERVIEW

1.1 How to Use this Volume 1-1
1.2 Acknowledgements 1-2

SECTION 2
ASPHALT EMULSION THEORY

2.1 Overview 2-1
2.2 Asphalt 2-1
2.3 Water 2-2
2.4 Emulsifying Agents (Surfactants) 2-3
2.5 References: 2-5

SECTION 3
SAFETY & HANDLING OF ASPHALT EMULSIONS

3.1 Handling 3-2
3.2 Sample Conditioning for Testing 3-3

SECTION 4
SINGLE AND MULTIPLE CHIP SEALS USING ASPHALT EMULSIONS

4.1 Scope 4-1
4.2 Definitions 4-1
4.3 Applicable Documents 4-1
4.3.1 ASTM Documents 4-1
4.3.2 AEMA Documents 4-2
4.4 Asphalt Emulsions 4-2
4.4.1 Cover Aggregates 4-2
4.4.2 Hardness 4-2
4.4.3 Gradation 4-3
4.4.4 Shape 4-3
4.4.5 Voids 4-4
4.5 Compatibility of Emulsion and Aggregate 4-4
4.6 Chip Seal Design 4-4
4.6.1 General 4-4

Paragraph Number		Page Number

4.6.2 Background for Chip Seal Design 4-4
4.6.2.1 Other Considerations 4-5
4.7 Single Chip Seal Design Without Access to a Laboratory 4-5
4.8 Multiple Chip Seal Design without Access to a Laboratory 4-6
4.9 Formal Chip Seal Design 4-6
4.10 Basic Construction Equipment 4-7
4.10.1 Emulsion Distributor 4-8
4.10.2 Cover Aggregate Spreaders 4-8
4.10.3 Rollers 4-9
4.10.4 Rotary Power Broom 4-9
4.10.5 Broom Drag 4-9
4.10.6 Cover Aggregate Trucks 4-10
4.11 Construction Operations 4-10
4.12 General Considerations 4-10
4.12.1 Preparation of a Granular or Stabilized Base 4-11
4.12.2 Preparation of a Paved Surface 4-12
4.12.3 Temperature and Weather Restraints 4-12
4.12.4 Spraying the Asphalt Emulsion 4-13
4.12.5 Applying the Cover Aggregate 4-14
4.12.6 Rolling 4-14
4.12.7 Removing Surplus Cover Aggregate 4-14
4.12.8 Constructing Multiple Chip Seals 4-15
4.12.9 Traffic Control for Newly Constructed Chip Seals 4-15
4.12.10 Graded Aggregate Seals 4-16
4.13 Do's and Don'ts 4-17

SECTION 5
SANDWICH SEALS USING ASPHALT EMULSIONS

5.1 Scope 5-1
5.2 Definitions 5-1
5.3 Asphalt Emulsion 5-1
5.3.1 Polymer Modified Asphalt Emulsion 5-1
5.4 Aggregates 5-1
5.5 Construction Techniques 5-2
5.5.1 Preparation of Road Surface 5-2
5.5.2 Application of 1st Aggregate 5-2
5.5.3 Application of Asphalt Emulsion 5-2
5.5.4 Application of 2nd Aggregate 5-2
5.5.5 Rolling 5-2
5.5.6 Traffic Control 5-2
5.5.7 Brooming 5-2
5.6 Advantages of Sandwich Seals 5-3

Paragraph Number | Page Number

SECTION 6
SCRUB SEALS USING ASPHALT EMULSIONS

6.1 Scope . . . 6-1
6.2 Definitions . . . 6-1
6.3 Applicable Documents . . . 6-2
6.3.1 ASTM Documents . . . 6-2
6.3.2 AEMA Documents . . . 6-2
6.4 Materials . . . 6-2
6.4.1 Asphalt Emulsions . . . 6-2
6.4.2 Cover Aggregates . . . 6-2
6.4.2.1 Aggregate Gradation . . . 6-2
6.4.2.2 Compatibility of Emulsion and Aggregate . . . 6-2
6.5 Construction Equipment . . . 6-3
6.5.1 Emulsion Distributor . . . 6-3
6.5.2 Emulsion Scrub Broom . . . 6-4
6.5.3 Cover Aggregate Spreaders . . . 6-4
6.5.4 Aggregate Scrub Broom . . . 6-4
6.5.5 Rollers . . . 6-4
6.5.6 Rotary Power Broom . . . 6-5
6.5.7 Cover Aggregate Trucks . . . 6-5
6.6 Construction Operations . . . 6-5
6.6.1 General Considerations . . . 6-5
6.6.2 Preparation of a Granular or Stabilized Base . . . 6-6
6.6.3 Preparation of a Paved Surface . . . 6-6
6.6.4 Temperature and Weather Restraints . . . 6-7
6.6.5 Spraying the Asphalt Emulsion . . . 6-7
6.6.6 Scrubbing the Emulsion . . . 6-8
6.6.7 Applying the Cover Aggregate . . . 6-8
6.6.8 Scrubbing the Cover Aggregate . . . 6-9
6.6.9 Rolling . . . 6-9
6.6.10 Removing Surplus Cover Aggregate . . . 6-9
6.7 Aggregate and Emulsion Scrub Brooms . . . 6-11
6.7.1 Aggregate Scrub Brooms . . . 6-11
6.7.2 Emulsion Scrub Brooms . . . 6-12

SECTION 7
RECOMMENDED PERFORMANCE GUIDELINES FOR EMULSIFIED ASPHALT SLURRY SEAL

7.1 Scope . . . 7-1
7.2 Description . . . 7-1
7.3 Applicable Specifications . . . 7-2
7.3.1 General . . . 7-2
7.4 Materials . . . 7-2

Paragraph Number		Page Number

7.4.1 Emulsified Asphalt 7-2
7.4.1.1 Quality Tests. 7-2
7.4.2 Aggregate 7-2
7.4.2.1 General. 7-2
7.4.2.2 Quality Tests. 7-3
7.4.2.3 Grading. 7-3
7.4.3 Mineral Filler 7-4
7.4.4 Water 7-4
7.4.5 Additives 7-4
7.5 Laboratory Evaluation 7-4
7.5.1 General. 7-4
7.5.2 Mix Design 7-4
7.5.3 Rate of Application 7-6
7.5.4 Tolerances 7-6
7.6 Equipment 7-7
7.6.1 General. 7-7
7.6.2 Mixing Equipment 7-7
7.6.3 Proportioning Devices 7-7
7.6.4 Spreading Equipment 7-8
7.6.5 Auxiliary Equipment 7-8
7.7 Calibration 7-8
7.7.1 Verification 7-8
7.8 Weather Limitations 7-8
7.9 Notification And Traffic Control 7-9
7.9.1 Notification 7-9
7.9.2 Traffic Control 7-9
7.10 Surface Preparation 7-9
7.10.1 General. 7-9
7.10.2 Tack Coat 7-9
7.10.3 Cracks 7-9
7.11 Application 7-10
7.11.1 General. 7-10
7.11.2 Joints 7-10
7.11.3 Mix Stability 7-10
7.11.4 Handwork 7-10
7.11.5 Lines. 7-11
7.11.6 Rolling. 7-11
7.11.7 Cleanup 7-11
7.12 Quality Control 7-11
7.12.1 Inspection 7-11
7.12.2 Materials. 7-11
7.12.3 Slurry Seal 7-11
7.12.4 Non-Compliance. 7-12

7.13 Payment 7-12
7.14 Appendix A: Agencies and Test Methods 7-12
7.14.1 Agencies 7-12
7.14.2 Test Methods 7-13
7.15 Appendix B: Instructions To The Writer 7-14
7.15.1 Technical Notes 7-14
7.15.1.1 Slurry Seal 7-14
7.15.1.2 Emulsified Asphalt 7-14
7.15.1.3 General 7-14
7.15.1.4 Grading 7-15
7.15.1.5 Mineral Filler 7-15
7.15.1.6 Additives 7-15
7.15.1.7 Laboratory Report 7-16
7.15.1.8 Slurry Mixing Equipment 7-16
7.15.1.9 Slurry Spreading Equipment 7-16
7.15.1.10 Calibration 7-16
7.15.1.11 Verification 7-16
7.15.1.12 Tack Coat 7-17
7.15.1.13 Lines 7-17

SECTION 8
CAPE SEALS USING ASPHALT EMULSIONS

8.1 Scope 8-1
8.2 Description 8-1
8.3 Applicable Documents 8-1
8.3.1 ASTM Standards 8-1
8.3.2 ISSA Documents 8-2
8.3.3 AEMA Documents 8-2
8.4 Asphalt Emulsions 8-2
8.5 Aggregate 8-3
8.5.1 Cover Aggregate for the Chip Seal 8-3
8.5.2 Aggregate for the Slurry Seal Mixes 8-3
8.6 Other Materials 8-4
8.6.1 Mineral Filler 8-4
8.6.2 Water 8-4
8.6.3 Additives 8-4
8.7 Cape Seal Design 8-4
8.7.1 Chip Seal 8-4
8.7.2 Slurry Seal 8-4
8.8 Equipment 8-4
8.8.1 Asphalt Emulsion Distributor 8-5
8.8.2 Cover Aggregate Spreader 8-5
8.8.3 Rollers 8-5

8.8.4 Rotary Broom 8-5
8.8.5 Slurry Mixing Equipment 8-5
8.8.6 Spreading Equipment 8-5
8.9 Preparation of Existing Surface 8-6
8.10 Chip Sealing 8-6
8.10.1 Tack Coat 8-7
8.10.2 Temperature and Weather Requirements 8-7
8.10.3 General Construction Procedures 8-7
8.11 Slurry Sealing 8-8
8.11.1 Materials Quantities 8-8
8.11.2 Temperature and Weather Requirements 8-8
8.11.3 General Construction Procedures 8-9

SECTION 9
RECOMMENDED PERFORMANCE GUIDELINES FOR MICRO-SURFACING

9.1 Scope 9-1
9.2 Description 9-1
9.3 Applicable Specifications 9-2
9.3.1 General 9-2
9.4 Materials 9-2
9.4.1 Emulsified Asphalt 9-2
9.4.1.1 General 9-2
9.4.1.2 Quality Tests 9-3
9.4.2 Aggregate 9-3
9.4.2.1 General 9-3
9.4.2.2 Quality Tests 9-3
9.4.2.3 Grading 9-4
9.4.3 Mineral Filler 9-5
9.4.4 Water 9-5
9.4.5 Additives 9-5
9.5 Laboratory Evaluation 9-5
9.5.1 General 9-5
9.5.2 Mix Design 9-5
9.5.3 Rate Of Application 9-7
9.6 Equipment 9-7
9.6.1 General 9-7
9.6.2 Mixing Equipment 9-7
9.6.3 Proportioning Devices 9-8
9.6.4 Spreading Equipment 9-8
9.6.4.1 Secondary Strike-off 9-8
9.6.4.2 Rut-Filling Box 9-8
9.6.5 Auxiliary Equipment 9-9

Paragraph Number		Page Number

9.7 Calibration 9-9
9.8 Weather Limitations 9-9
9.9 Notification And Traffic Control 9-9
9.9.1 Notification 9-9
9.9.2 Traffic Control 9-9
9.10 Surface Preparation 9-9
9.10.1 General 9-9
9.10.2 Tack Coat 9-10
9.10.3 Cracks 9-10
9.11 Application 9-10
9.11.1 General 9-10
9.11.2 Joints 9-10
9.11.3 Mix Stability 9-11
9.11.4 Handwork 9-11
9.11.5 Lines 9-11
9.11.6 Clean-up 9-11
9.12 Method Of Measurement 9-11
9.12.1 Area 9-11
9.12.2 Ton And Gallon 9-11
9.13 Payment 9-12
9.14 Appendix A: Agencies and Test Methods 9-12
9.14.1 Agencies 9-12
9.14.2 Test Methods 9-12
9.15 Appendix B: Re-Profiling Rutted Wheelpaths with Micro-Surfacing 9-13
9.15.1 Rule of Thumb 9-13

SECTION 10
ASPHALT EMULSION PRIME (AEP)

10.1 Scope 10-1
10.2 Description 10-1
10.2.1 Definitions 10-1
10.2.2 Functions of AEP Treatments 10-1
10.3 Applicable Documents 10-1
10.3.1 ASTM Standards 10-1
10.4 Asphalt Emulsion 10-1
10.4.1 Dilution 10-2
10.5 Equipment 10-2
10.5.1 Pressure Distribution 10-2
10.5.2 Grader/Scarifier 10-2
10.5.3 Water Sprinkler 10-2
10.5.4 Compaction Equipment 10-2
10.6 Construction 10-3
10.6.1 Preparation of Area to be Treated 10-3

Paragraph Number | Page Number

10.6.1.1 Grading . . . 10-3
10.6.1.2 Watering . . . 10-3
10.6.2 Application . . . 10-3
10.6.3 Compaction . . . 10-3
10.6.4 Application of Sand Cover . . . 10-3
10.6.5 Performance Criteria . . . 10-3
10.7 Precautions and Protection of Work . . . 10-4

SECTION 11
TACK COATS & FOG SEALS USING ASPHALT EMULSIONS

11.1 Scope . . . 11-1
11.2 Definitions . . . 11-1
11.2.1 Tack Coat . . . 11-1
11.2.2 Fog Seal . . . 11-1
11.2.3 Flush Coat . . . 11-1
11.2.4 Emulsion Break . . . 11-1
11.2.5 Dense Surface . . . 11-1
11.2.6 Open Surface . . . 11-1
11.3 Applicable Documents . . . 11-2
11.3.1 ASTM Documents . . . 11-2
11.3.2 AEMA Documents . . . 11-2
11.3.3 Sampling . . . 11-2
11.3.4 Testing . . . 11-2
11.4 Water . . . 11-2
11.4.1 Other Methods of Dilution . . . 11-3
11.4.2 Diluting the Emulsion . . . 11-3
11.4.2.1 Consult your AEMA emulsion supplier for guidance on exact dilutions . . . 11-3
11.5 Storage and Handling . . . 11-3
11.6 Equipment . . . 11-4
11.6.1 Emulsion Distributor or Hand Sprayer . . . 11-4
11.6.2 Pump . . . 11-4
11.6.3 Recommended Spray Nozzle Sizes . . . 11-4
11.7 Preparation of Surface . . . 11-4
11.7.1 Existing Surface . . . 11-4
11.8 Weather . . . 11-4
11.9 Application . . . 11-5
11.9.1 Spraying . . . 11-5
11.9.2 Application Rates for Tack Coat . . . 11-5
11.9.3 Application Rates for Fog Seal . . . 11-5
11.9.4 Objective . . . 11-5
11.9.4.1 Tack Coat . . . 11-5
11.9.4.2 Fog Seal . . . 11-5
11.9.5 Traffic Control . . . 11-5

SECTION 12
RESTORATIVE SEALS USING EMULSIFIED RECYCLING AGENTS

12.1 Scope 12-1
12.2 Definitions 12-1
12.2.1 Restorative Seal 12-1
12.2.2 Construction Seal 12-1
12.2.3 Dense Surface 12-1
12.2.4 Open Surface 12-1
12.3 Applicable Documents 12-1
12.3.1 ASTM Documents 12-1
12.3.2 AEMA Documents 12-2
12.4 Description of Work 12-2
12.5 Recycling Emulsion 12-2
12.6 Water 12-2
12.6.1 Other Methods of Dilution 12-3
12.6.2 Diluting the Emulsion 12-3
12.7 Storage and Handling 12-3
12.8 Equipment 12-4
12.8.1 Emulsion Distributor 12-4
12.8.2 Foreign or Objectionable Materials 12-4
12.8.3 Calibration 12-5
12.8.4 Operator 12-5
12.9 Preparation of Surface 12-5
12.10 Application 12-5
12.10.1 Spraying 12-5
12.10.2 Application Temperature 12-5
12.10.3 Application Rate 12-5
12.10.4 Objective of Restorative or Construction Seals 12-5
12.10.5 Over-Application 12-6
12.10.6 Spills 12-6
12.11 Weather 12-6
12.12 Traffic Control 12-6

SECTION 13
COLD MIXED ASPHALT EMULSION MAINTENANCE MIXES

13.1 Scope 13-1
13.2 Applicable Documents 13-1
13.2.1 ASTM Documents 13-1
13.2.2 AEMA Documents 13-1
13.3 Asphalt Emulsion 13-1
13.3.1 Sampling and Testing 13-1
13.4 Aggregate 13-2

Paragraph Number		Page Number

13.5 Testing of Asphalt Paving Mixture 13-2
13.6 General Requirements 13-3
13.7 Handling & Use 13-3
13.8 Mixing 13-3
13.8.1 Mixing Moisture 13-3
13.8.2 Central Plant Mix 13-4
13.8.3 Travel Mixers 13-4
13.8.4 Rotary Mixers 13-4
13.8.5 Distributor & Motor Grader Mixing 13-5
13.8.6 Secondary Mixing 13-6
13.9 Stockpile Procedure 13-6
13.10 Construction Practice 13-6
13.11 11. Methods of Sampling And Testing 13-6

SECTION 14
HOT MIXED ASPHALT EMULSION MAINTENANCE MIXES

14.1 Scope 14-1
14.2 Applicable Documents 14-1
14.2.1 ASTM Documents: 14-1
14.2.2 AEMA Documents 14-1
14.3 Asphalt Emulsion 14-2
14.3.1 Sampling and Testing 14-2
14.3.2 Selection of Asphalt Emulsion 14-2
14.4 Aggregate 14-2
14.5 Testing of Asphalt Paving Mixture 14-2
14.6 General Requirements 14-3
14.7 Composition Of Paving Mixtures 14-3
14.8 Mixing Plant 14-4
14.9 Mixing Plant Operation 14-4
14.9.1 Aggregate Storage 14-4
14.9.2 Storage & Handling of Asphalt Emulsion 14-4
14.9.3 Preparation and Handling of Mineral Aggregates 14-4
14.10 Mix and Temperature 14-5
14.11 Stockpile Procedure 14-5
14.12 Construction Practice 14-5
14.13 Methods of Sampling and Testing 14-5

Paragraph Number | Page Number

SECTION 15
OPEN-GRADED MIXES USING ASPHALT EMULSIONS

15.1 Scope 15-1
15.2 Description 15-1
15.3 Applicable Documents 15-3
15.3.1 ASTM Documents 15-3
15.3.2 AEMA Documents 15-3
15.4 Asphalt Emulsion 15-3
15.4.1 Asphalt Emulsion for Open Graded Mixes 15-3
15.4.2 Grades of Asphalt Emulsion 15-3
15.5 Aggregates 15-4
15.6 Design 15-4
15.6.1 Mixtures 15-4
15.6.2 Structural Thickness 15-5
15.7 General 15-5
15.7.1 Pre-construction Meeting 15-5
15.7.2 Preparation of an Existing Asphalt Surface 15-5
15.7.3 Preparation of Subbase 15-6
15.8 Mixing 15-6
15.8.1 Mixing Moisture 15-6
15.8.2 Central Plant Mix 15-6
15.8.3 Travel Mixers 15-7
15.9 Spreading And Conditioning 15-7
15.10 Compaction 15-8
15.11 Traffic Control 15-8
15.12 Precautions 15-9

SECTION 16
DENSE-GRADED MIXES USING ASPHALT EMULSIONS

16.1 Scope 16-1
16.2 Description 16-1
16.3 Applicable Documents 16-1
16.3.1 ASTM Documents 16-1
16.3.2 AEMA Documents 16-2
16.4 Asphalt Emulsion 16-2
16.4.1 Coating Ability 16-2
16.4.2 Workability 16-2
16.4.3 Grades of Asphalt Emulsion 16-2
16.5 Aggregates 16-2
16.6 Design 16-3
16.7 General 16-4
16.7.1 Preparation of the Roadbed 16-4
16.7.2 Aggregate Preparation 16-4

Paragraph Number		Page Number

16.7.3 Windrows 16-5
16.8 Mixing 16-6
16.8.1 Mixing Moisture 16-6
16.8.2 Central Plant Mix 16-6
16.8.3 Travel Mixers 16-7
16.8.4 Rotary Mixers 16-7
16.8.5 Distributor & Motor Grader Mixing 16-8
16.8.6 Secondary Mixing 16-9
16.9 Spreading and Conditioning 16-9
16.10 Compacting 16-10
16.11 Seal Coat & Fog Seals 16-11
16.12 Traffic Control 16-11
16.13 Weather 16-11
16.14 Precautions 16-12

SECTION 17
SAND MIXES USING ASPHALT EMULSIONS

17.1 Scope 17-1
17.2 Applicable Documents 17-1
17.2.1 ASTM Documents 17-1
17.2.2 AEMA Documents 17-1
17.3 Asphalt Emulsion 17-1
17.4 Aggregates 17-1
17.5 Mineral Filler 17-2
17.6 Other Additives 17-2
17.6.1 Mix Composition 17-2
17.7 Preparation of Roadbed 17-2
17.8 Aggregate Preparation 17-3
17.9 Mixing 17-4
17.9.1 Mixing Moisture 17-4
17.9.2 Central Plant Mix 17-4
17.9.3 Travel Mixers 17-5
17.9.4 Rotary Mixers 17-5
17.9.5 Distributor & Motor Grader Mixing 17-6
17.9.6 Secondary Mixing 17-7
17.10 Spreading and Conditioning 17-7
17.11 Compaction 17-8
17.12 Surface Seal 17-9
17.13 Traffic Control 17-9

SECTION 18
WARM MIXES USING ASPHALT EMULSIONS

18.1 Scope 18-1
18.1.1 Applicable Documents 18-1
18.1.2 ASTM Documents: 18-1
18.1.3 AEMA Documents 18-1
18.2 Descriptions 18-2
18.3 Asphalt Emulsions 18-2
18.4 Aggregate. 18-2
18.5 Mineral Filler. 18-3
18.6 Design Considerations 18-3
18.6.1 Subgrade 18-3
18.6.2 Subbase 18-3
18.6.3 Base 18-3
18.6.4 Binder 18-3
18.6.5 Surface 18-3
18.7 Composition of Paving Mixtures. 18-3
18.8 Mixing Plant 18-4
18.9 Mixing Plant Operation. 18-5
18.9.1 Aggregate Storage 18-5
18.9.2 Storage & Handling of Asphalt Emulsion 18-5
18.9.3 Preparation and Handling of Mineral Aggregates. 18-5
18.10 Mix and Temperature 18-5
18.11 Construction 18-5
18.11.1 Spreading 18-5
18.11.2 Compaction 18-6
18.12 Methods of Sampling And Testing 18-6

SECTION 19
HOT MIXES USING ASPHALT EMULSIONS

19.1 Scope 19-1
19.2 Applicable Documents 19-1
19.2.1 ASTM Documents: 19-1
19.2.2 AEMA Documents 19-1
19.3 Descriptions 19-2
19.4 Asphalt Emulsions 19-2
19.5 Aggregate. 19-2
19.6 Mineral Filler. 19-3
19.7 Design Considerations 19-3
19.7.1 Subgrade 19-3
19.7.2 Subbase 19-3
19.7.3 Base 19-3
19.7.4 Binder 19-3

Paragraph Number		Page Number

19.7.5 Surface 19-3
19.8 Composition of Paving Mixtures. 19-3
19.9 Mixing Plant 19-4
19.10 Mixing Plant Operation. 19-5
19.10.1 Aggregate Storage 19-5
19.10.2 Storage & Handling of Asphalt Emulsion 19-5
19.10.3 Preparation and Handling of Mineral Aggregates. 19-5
19.11 Mix and Temperature. 19-5
19.12 Construction. 19-5
19.12.1 Spreading 19-5
19.12.2 Compaction 19-6
19.13 Methods of Sampling and Testing 19-6

SECTION 20
TECHNICAL DISCIPLINES

20.1 Overview 20-1
20.1.1 Cold In-Place Recycling 20-1
20.1.1.1 Process. 20-1
20.1.1.2 Application 20-1
20.1.1.3 Advantages. 20-2
20.1.1.4 Economics 20-2
20.1.2 Full Depth Reclamation 20-2
20.1.2.1 Process. 20-2
20.1.2.2 Application 20-2
20.1.2.3 Advantages. 20-2
20.1.2.4 Economics 20-3
20.1.3 Hot In-Place Recycling 20-3
20.1.3.1 Process. 20-3
20.1.3.2 Application 20-3
20.1.3.3 Advantages. 20-3
20.1.3.4 Economics 20-4
20.2 Guidelines for Cold in-Place Recycling 20-4
20.2.1 Introduction. 20-4
20.2.2 Cold In-Place Recycling Methods. 20-4
20.2.3 Model Specifications for Cold In-Place Recycling 20-5
20.2.3.1 Description 20-5
20.2.3.2 Materials. 20-6
20.2.3.3 Construction Requirements 20-6
20.2.3.4 Equipment 20-6
20.2.3.5 Method Of Measurement 20-7
20.2.4 Advantages of Cold In-Place Recycling 20-7
20.2.4.1 Deteriorated Roadways can be Returned to Original Standards:. 20-7
20.2.4.2 Cost Effective: 20-8

Paragraph Number		Page Number

20.2.4.3 Convenience to Traveling Public: . . . 20-8
20.2.4.4 Environmental Advantage . . . 20-8
20.3 Guideline Specifications for Full Depth Reclamation . . . 20-8
20.3.1 Definition. . . . 20-8
20.3.2 Introduction. . . . 20-8
20.3.3 Design . . . 20-8
20.3.4 Process. . . . 20-9
20.3.5 Sample Specifications for Full Depth Reclamation. . . . 20-9
20.3.5.1 Description . . . 20-9
20.3.5.2 Equipment . . . 20-10
20.3.5.3 Application and Mixing of Liquid Additives . . . 20-10
20.3.5.4 Construction Method . . . 20-10
20.3.5.5 Payment . . . 20-11
20.3.6 Advantages and Performance of Full Depth Reclamation . . . 20-11
20.4 Guideline Specifications for Hot In-Place Recycling . . . 20-12
20.4.1 Introduction. . . . 20-12
20.4.2 Pre-Bid Considerations. . . . 20-13
20.4.3 Guideline Bid Specifications for Hot In-Place Recycling . . . 20-14
20.4.3.1 Prequalification Clause. . . . 20-14
20.4.3.2 Scope . . . 20-14
20.4.3.3 Cleaning and Preparation. . . . 20-14
20.4.3.4 Equipment and Construction Details . . . 20-14
20.4.3.5 Project Management Details . . . 20-16

SECTION 21
ASPHALT EMULSION EQUIPMENT PUMPS

21.1 Introduction . . . 21-1
21.2 Pumps . . . 21-1
21.2.1 Positive Displacement Pumps . . . 21-1
21.2.1.1 Mechanical Operations of the Pump . . . 21-1
21.2.1.2 Pump Features. . . . 21-1
21.2.2 Centrifugal Pump . . . 21-2
21.2.2.1 Mechanical Operations of the Pump . . . 21-2
21.2.2.2 Pump Features. . . . 21-2
21.2.3 Pros and Cons Between the Two Types of Pumps . . . 21-2
21.2.3.1 Positive Displacement . . . 21-2
21.2.3.2 Centrifugal . . . 21-2
21.3 Sizing the Pump and Motor . . . 21-2
21.4 Installing the Pump-Motor-Tank Systems . . . 21-3
21.4.1 Pump-Motor Foundation. . . . 21-3
21.4.2 Direct versus Indirect Drive . . . 21-3
21.4.3 Proper Pump Installation . . . 21-3
21.4.4 Pump Location . . . 21-3

Paragraph Number		Page Number

21.4.5 Pump Heating 21-4
21.4.6 Strainer 21-4
21.4.7 System Plumbing 21-4
21.5 Pump Maintenance 21-5
21.5.1 Lubrication 21-5
21.5.2 Packing Adjustment 21-5
21.5.3 Replacing Packing 21-5
21.5.4 Ground Packing Material 21-5
21.6 Cleaning And Winter Storage. 21-5
21.6.1 Cleaning 21-5
21.6.2 Winter Storage 21-6
21.7 Troubleshooting 21-6
21.7.1 Pump Does Not Pump 21-6
21.7.2 Pump Is Noisy 21-6
21.7.3 Pump Delivery is Low 21-6
21.7.4 Pump Takes TOO Much power 21-6
21.7.5 Use of Vacuum Gauge in Suction Port 21-7
21.7.5.1 High Reading.. 21-7
21.7.5.2 Low Reading. 21-7
21.7.5.3 Erratic Reading. 21-7
21.7.6 Use of Pressure Gauge in Discharge Port 21-7
21.7.6.1 High Reading 21-7
21.7.6.2 Low Reading. 21-7
21.7.6.3 Erratic Reading. 21-7

SECTION 22
ASPHALT EMULSION EQUIPMENT: TANKS & HEAT SYSTEMS

22.1 Introduction 22-1
22.2 Storage Tanks 22-1
22.2.1 Tank Foundations. 22-1
22.2.2 Tank Design 22-1
22.2.2.1 Vertical Tanks. 22-1
22.2.2.2 Horizontal Tanks. 22-1
22.2.2.3 Tank Features 22-1
22.2.2.4 Tank Plumbing 22-2
22.2.2.5 Location 22-2
22.3 Heating Systems 22-3
22.3.1 Heaters. 22-3
22.3.1.1 Hot Oil Heaters. 22-3
22.3.1.2 Steam 22-3
22.3.1.3 Water 22-3
22.3.1.4 Solar 22-3
22.3.1.5 Electrical. 22-4

Paragraph Number		Page Number
22.3.2	Coils	22-4
22.3.3	Other	22-4
22.4	Tankers	22-4
