

## **401.02.5A, Hydrated Lime**

### **Qualification Requests**

On the laboratory test report that is sent in with the request, the test data must show that the material is in compliance with the material requirements.

### **Qualification Samples**

The requirements for samples that are received for QPL prequalification are as follows.

- ◆ The producer will submit a minimum of two 5 pound samples for each type of Lime to be considered along with test results from an independent laboratory.
- ◆ MDT will test each sample according to the tests outlined in subsection "713.02 Hydrated Lime". The material will be rejected if the material does not meet the requirements.

### **Material Requirements**

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 713.02, the Supplemental specifications to Montana Standard Specifications subsection 713.02, or contract Special Provisions.
