

## 622.02, Geotextiles

### Qualification Requests

On the laboratory test report that is sent in with the request, the test data must show that the material is in compliance with the material requirements

### Qualification Samples

The requirements for samples that are received for QPL prequalification are as follows.

- ◆ The producer will submit a minimum of three samples of each type of material along with test results from an independent laboratory for each sample. A sample is one sample per 10,000 square yards for each type of material to be considered.
- ◆ MDT will test each sample according to the tests outlined in subsection "716 Geotextiles". The material will be rejected if the material does not meet the requirements.

### Material Requirements

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 716, the Supplemental specifications to Montana Standard Specifications subsection 716, or contract Special Provisions.
