NOTE: Site Names with an asterisk "*" are either old EFAS frequencies that are to be returned to service with a new frequency (103 of these) or another frequency (36 of these) that are being retuned to a frequency that is within the Flight Service band.

A NOTAM will be issued for any frequencies that are returned to service or retuned as they occur followed by updates to the charts and publications. The lists do not include VOR frequencies recommended for retention under the VOR Minimum Operational Network (MON) Program.
