

551.02.1, Cement

Qualification Requests

Provide the Department with a completed request form and a laboratory test report showing that the material is in compliance with the Department's material requirements.

Material Requirements

Provide materials meeting the requirements of the Standard Specifications for Road and Bridge Construction subsection 551.02.1 Cement modified as necessary to address corresponding supplemental specifications, or contract Special Provisions.

Qualification Procedures

Submit a 15 pound sample for each type of cement to be considered along with test results from an independent laboratory.

The Department will test each sample according to the tests outlined in subsection "551.02.1 Cement". Materials not meeting the requirements will be rejected. Materials meeting the requirements will be placed on the QPL.
