

551.02.10, Fly Ash

Qualification Requests

Provide the Department with a completed request form and a laboratory test report showing that the material is in compliance with the Department's material requirements.

Material Requirements

Provide materials meeting the requirements of the Standard Specifications for Road and Bridge Construction subsection 551.02.10 Fly Ash modified as necessary to address corresponding supplemental specifications, or contract Special Provisions.

Qualification Procedures

Submit two samples in 250 ml plastic bottles (i.e. Nalgene or similar) for each type of Fly Ash to be considered along with test results from an independent laboratory.

The Department will test each sample according to the tests outlined in subsection "551.02.10 Fly Ash". Materials not meeting the requirements will be rejected. Materials meeting the requirements will be placed on the QPL.
