

## **606.02, MASH W-Beam Terminal Sections**

### **Qualification Requests**

The information that is sent in with the request must show that the material is in compliance with the material requirements.

### **Qualification Samples**

The requirements for the information that is received for QPL prequalification are as follows.

The producer will submit a packet with the following information.

- ◆ Product information sheet.
- ◆ Product Manual.
- ◆ FHWA MASH acceptance letter.
- ◆ Product Drawings and specifications.
- ◆ Installation instructions.
- ◆ Information showing that the product meets the Buy America requirement.

### **Material Requirements**

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 606.02, the Supplemental specifications to Montana Standard Specifications subsection 606.02 or contract Special Provision.

Requirements for the steel used may be found in the Standard Specifications for Road and Bridge Construction subsection 106.09, the Supplemental specifications to Montana Standard Specifications subsection 106.09.

### **Qualification Process**

Once the information is received it will be looked at to see if it meets the Departments needs. If it is determined to meet our needs it will be put on the QPL.
