

623.02, Mailboxes (Standard)

Qualification Requests

Requests for qualification must include documentation that shows the product is in compliance with material requirements.

Qualification Samples

QPL prequalification requirements for mailboxes are as follows.

- ◆ The producer will submit a set of detailed drawings and a letter from the Post Master General stating that the product meets specifications.
- ◆ MDT will ensure that the product meets the requirements in subsection 623. The material will be rejected if MDT's requirements are not met.

Material Requirements

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 623, the Supplemental specifications to Montana Standard Specifications subsection 623, contract Special Provisions, and as follows.

- ◆ The standard size T2 is to be approximately 6 inches wide by 7 inches tall by 19 inches long.
