

# COW COULEE

Watershed # 7- Missouri-Sun-Smith River Basin  
Broadwater County, Montana

## LAND OWNERSHIP: PRIVATE

## BACKGROUND INFORMATION

The Cow Coulee wetland mitigation project was constructed in 1997 to provide partial mitigation for existing and projected wetland impacts resulting from Montana Department of Transportation (MDT) projects in Watershed #7 (Missouri-Sun-Smith River Basin). Constructed in the MDT Butte District, the 9-acre mitigation site is located approximately southwest of the Townsend city limits in Broadwater County. This restoration project is anticipated to provide approximately 5 acres of mitigation credits to mitigate transportation projects in the watershed.
