

List of Figures

2-1	Diagram of an Asphalt Emulsion Manufacturing Plant	2-7
2-2	Relative Sizes and Distribution of Asphalt Particles in an Emulsion	2-10
4-1	Particle Charge Test	4-2
4-2	Saybolt Furol Viscosity Test	4-3
4-3	Distillation Test for Asphalt Emulsion	4-6
4-4	Float Test	4-8
6-1	Flat Particles Are Covered When Enough Asphalt Is Used to Hold Cubical Particles	6-6
6-2	Akzo Noble HD10 Slurry Seal Equipment	6-13
6-3	Flow Diagram of a Typical Slurry Seal Mixer	6-14
6-4	Akzo Noble CRM500 Continuous Laydown Micro-Surfacing Unit	6-18
6-5	Asphalt Distributor	6-23
6-6	Proper Nozzle Angle Setting	6-23
6-7	Spray Bar Height Must Be Set Exactly for Proper Coverage	6-24
6-8	Tailgate Vane Spreader	6-26
6-9	Hopper-Type Tailgate Spreader	6-26
6-10	Truck-Attached Mechanical Spreader	6-27
6-11	Self-Propelled Mechanical Spreader	6-28
6-12	Pneumatic-Tired Roller	6-29
6-13	Power Sweeper	6-30
6-14	Surface Treatment Operation	6-31
6-15	Longitudinal Streaking	6-35
6-16	Bleeding Asphalt	6-35
6-17	Loss of Cover Aggregate	6-36
7-1	Dimensions for Windrow Volume	7-5
7-2	Road Reclaiming Machine	7-7
7-3	Travel Plant, Hopper Type	7-8
7-4	Blade Mixing Operation	7-9
7-5	Cold-Mix Continuous Plant	7-12
7-6	Stockpiled Asphalt Emulsion-RAP Maintenance Mix	7-16
8-1	Applying Tack Coat	8-2
8-2	Using Asphalt Emulsion to Tie Down Mulch	8-4
8-3	Completed Section of Interstate Highway With Asphalt Emulsion Mulch on Median and Close-Up	8-5
8-4	Filling a Crack With Asphalt Emulsion	8-7

**Figure
Number**

**Page
Number**

8-5	Spray-Injection Process — Tack Coat (L), Completed Patch (R)	8-9
9-1	Deteriorated Asphalt Pavement and Candidate for Recycling	9-3
9-2	Loss of Curb Height/Reveal and Drainage Capacity	9-5
9-3	Cold Planing/Milling Machine Removing Asphalt Pavement	9-6
9-4	Central/Stationary Plan With RAP Sizing Unit	9-7
9-5	Multiple Unit or “Train” for Cold In-Place Recycling	9-7
9-6	Asphalt Pavement Reclaiming Machine Adding Asphalt Emulsion	9-9
10-1	Selection of Optimum Emulsion Content Open-Graded Aggregate-Asphalt Emulsion Mixture	10-7
