# Montana's Airports Support Our State

Montana's airports play an integral role in our transportation system by providing access to destinations within the state, throughout the country, and across the globe. Airports also offer significant economic benefits to our communities by supporting jobs; generating payroll; paying taxes; and triggering spending at local, regional, and state levels.

The importance of airports goes beyond transportation and economics. Airports offer services and other attributes of value that cannot always be easily measured in dollars and cents. Residents and visitors use airports for leisure and business travel, and airports serve as the base for a wide range of critical activities such as wildland firefighting, search and rescue operations, and training for future aviators. Airports are the starting point for aircraft that conduct utility inspections, provide medical evacuation services, and transport staff and executives for business activity.

To better understand the value of Montana's airports from the perspective of both economics and community benefits, the Montana Department of Transportation (MDT) conducted a comprehensive study of the state's aviation facilities. The study analyzed the contributions of the Montana airport system, including aviation-related and non-aviation-related businesses, visitor spending, capital expenditures on construction, and additional spin-off (or "multiplier") effects. The study also examined specific activities and uses at each airport to identify how these facilities support Montana's residents and visitors.

## Methodology

This study expresses the economic benefits of Montana's airports in terms of jobs, payroll, and total annual economic impact derived from the activities that occur at aviation facilities. Direct impacts include those from on-airport businesses, construction-related activities, and spending from visitors who travel through an airport. Airports host on-airport businesses that serve aircraft or passengers such as:

- Administration
- Military
- Airlines
- Maintenance
- Parking
- Concessions
- Car rental
- General aviation
- Air tours
- Air cargo

Additionally, airside and landside construction projects require continuous investments, many of which are high-dollar, long-term undertakings. Because commercial service and general aviation airports are essential to visitors' abilities to conduct business or vacation in Montana, airports support the hospitality industry through lodging, restaurant, retail, and entertainment spending.

Airports' direct impacts also have spin-off effects throughout Montana, as dollars spent at an airport and by visitors off-airport are re-spent locally, regionally, and statewide. Spin-off effects are caused when a portion of direct business revenues are used to purchase goods and services in Montana (i.e., indirect effects) and when the portion of revenues paid as wages to workers are spent within the state (i.e., induced effects).

*Combined, direct impacts and spin-off effects compose the total contribution of an individual airport and determine the statewide impact of Montana's airport system.*

## STATEWIDE IMPACTS

Aviation is a vital key to Montana's economic activity and transportation network. The public-use airports in the state contribute:

## DIRECT ECONOMIC IMPACTS

**On-Airport**  
**\$139,000**

**Construction**  
**\$88,000**

**Visitor Spending**  
**\$14,000**

**SPIN-OFF ECONOMIC EFFECT**  
**\$241,000**

## S01 TOTAL IMPACTS

4  
\$151,000  
\$450,000

The block contains three icons: an orange person icon with the number '4' inside, a green dollar sign icon with '\$151,000' next to it, and a blue gear icon with '\$450,000' inside it.

Agricultural Spraying

Corporate/ Business Activity

Aerial/Wildland Firefighting

Emergency Medical Aviation

## Conrad Airport

Conrad Airport (S01) is one mile west of the City of Conrad, Montana, which serves as the county seat of Pondera County. Conrad sits at the edge of the Rocky Mountains in the northwest region of the state, providing excellent access to outdoor recreational activities. Located along Interstate 15, the airport is directly accessible to the city's 2,650 residents.

Conrad Airport is an important regional resource that plays a vital role protecting the health and safety of the community. The airport is essential for medical flights, and doctors are flown from Kalispell City Airport each week (50 annual flights). The airport also frequently serves as a customs stop for itinerant general aviation aircraft traveling to Canada. U.S. Customs and Border Patrol employees use the airport's facilities to conduct administrative work and clearance activities.

Other activities include agricultural spraying provided by Minute Man Aviation, corporate flights, and aerial wildland firefighting. Airport staff are also planning to host airshows in the near future. Sullivan Construction, the airport's sole tenant, provides snow removal in the winter season.

Like many other general aviation airports in Montana, Conrad Airport serves as a gateway to an otherwise remote location.
