Trimble Business Center
**Exporting Corridors as .crd Files**

May 2021

Exporting Corridors as a .crd file using Trimble Business Center

1. With Trimble Business Center open, browse to your corridor file and open it.

2. Ensure that the correct surfaces are made in corridor for staking surfaces.
   ➢ Ex. – Finish
3. Select Export from the Ribbon Menu

4. Select Corridor

5. Select the file format settings as shown below:
   ➢ Select Trimble Access road strings (A)
   ➢ Select surface to be staked (B)
   ➢ Select File Path to flash drive for TSC 7 (C)
   ➢ Select GENIO for Output file type (D)
   ➢ (Note that corridors may need to be broken into smaller files via Begin Station and End Station. Otherwise data collector can be encumbered with too much data. ½ mile increments may be appropriate) (E)
   ➢ Left side slope and Right-side slope correspond with node that will be staked. (F)
