Subject: Culvert Bid Items

We are undergoing an effort to combine culverts of the same size and material into one bid item and eliminate the class/thickness. This will reduce the overall number of bid items for culverts and improve bid history. Coated pipe bid items will also be eliminated. The different class/thickness as well as coating will still be shown on the Culvert Summary frames for proper placement in the field.

Please refer to the current bid item list when working on estimates for the following pipe descriptions: CSP, CSP IRR, CSP SLOTTED, CSP A, SSPP, SSPP A, RCP, RCP IRR, RCP SIPHON, and RCP A. Select the bid item numbers that don’t include designations for thickness or coating.

Example:
Recommendations call for the use of coated and uncoated 24” 0.079 at various locations, which is reflected in the Culvert Summary frame by station (no change to current practice).
However, the lengths for all the 24” CSP culverts are combined into one line for 24” CSP on the Culvert Summary Recap frame.

<table>
<thead>
<tr>
<th>BASIC BID</th>
<th>linear feet</th>
<th>cubic yards</th>
</tr>
</thead>
<tbody>
<tr>
<td>24” CSP</td>
<td>460</td>
<td>387.0</td>
</tr>
<tr>
<td>84” CSP</td>
<td>224</td>
<td>68.4</td>
</tr>
<tr>
<td>TOTAL</td>
<td>~</td>
<td>455.4</td>
</tr>
</tbody>
</table>

Currently, there are four different bid items for 24” diameter CSP:
- 603010532 CSP 24 IN 0.064
- 603010538 CSP 24 IN 0.079-CTD
- 603010539 CSP 24 IN 0.079
- 603010540 CSP 24 IN

Select bid item number 603010540 for use in the cost estimate.

Contact Suzy Price in Contract Plans for less common sizes with bid items that haven’t been consolidated or don’t exist and for any other questions regarding this change.

This process is effective immediately.
