

NBI Bridge ID	Location	Feature Crossed	Comments
S00447052+05081	Ashland	Tongue River	The river hits the piers and right abutment at a poor angle causing pier scour and abutment concerns.
P00013093+06931	2M W Three Forks	Jefferson River	There is a scour hole between Piers 2 and 3 that is below the footings. It's not clear if the riprap around Pier 3 is still there and there's no riprap around Pier 2.
S00346006+00001	5M E Manhattan	East Gallatin River	The river has shifted past the bridge opening causing a bad approach angle on the center wall pier causing significant scour and debris build up
U08103003+01631	Missoula-Reserve St	Clark Fork Flood Plain	Concerned about scour at main bridge.
U08103003+02921	Missoula-Reserve St	Clark Fork River	Concerned about scour at main bridge.
S00310000+08501	1M N Custer	Yellowstone River	Lost abutment riprap. Debris on piers. Needs repair. Footings embedded into bedrock, Geotech: formation material has low susceptibility to scour.
P00007043+06661	3M S Hamilton	Bitterroot River	The cable tied blocks are reported to be buckling and separating. There is also a large scour hole downstream of Pier 4 for an unknown reason.
I00090292+04251	3.1 M E Manhattan	Gallatin River	Cable tied blocks are exposed, the concrete blocks are wearing thin, several cables are broken, and there is scour next to matressess.
I00090292+04252	3.1 M E Manhattan	Gallatin River	Cable tied blocks are exposed, the concrete blocks are wearing thin, several cables are broken, and there is scour next to matressess.
S00370000+05361	2M NE Victor	Bitterroot River	The scour is below the top of the footing where the cable tied blocks should be. Underwater inpection only shows paritially around Piers 2 and 3.
P00049027+05411	Twin Bridges	Beaverhead River	The scour is below the top of the footing and it's not clear if the riprap is still around the piers. Large scour hole in center of channel.
S00300000+02001	Ryegate	Musselshell River	Riprap around the center pier is missing and the scour depth is below the bottom of the footing. The pier is on piles though.
I00090333+05521	Livingston	Yellowstone River	Sonar installed.
I00090333+05522	Livingston	Yellowstone River	Sonar installed.
S00347003+04001	3M SW Belgrade	West Gallatin River	Pier scour plots below footings. No mitigation in place.
S00359002+02661	Jefferson Island	Jefferson River	No mitigation in place.
P00042005+04561	5M N Flowing Wells	Timber Creek	Pier scour plots below footings. No mitigation in place.
