

NJDOT-BRIIT AI Research and Pilots

**NASTO25 Conference,
New Brunswick, NJ
July 8-10, 2025**

**Presented by Giri Venkateela, PhD
Innovation Officer
BRIIT
July 9, 2025**

NEW JERSEY DEPARTMENT OF TRANSPORTATION

Outline

- Introduction
- AI Overview
- NJDOT-BRIIT-AI Research Vision
- NJDOT –BRIIT –AI Research Framework
- Conclusions

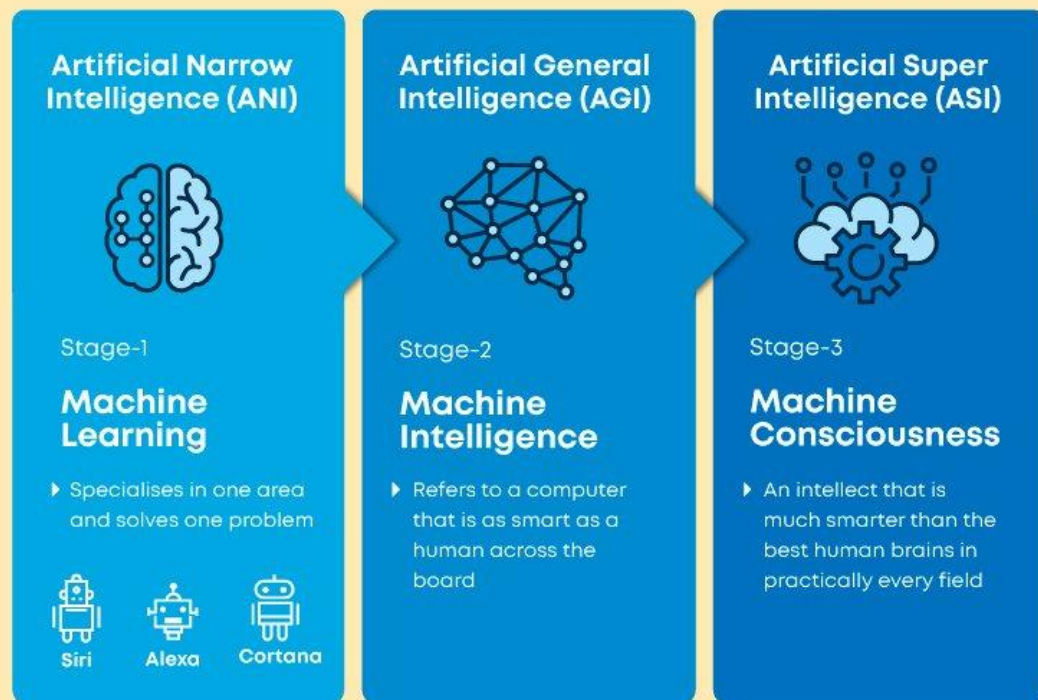

What is AI?

**Analytical
Artificial
Intelligence**
Making
predictions
based on
patterns in
data

**Generative
Artificial
Intelligence**
Making new
content
based on
patterns in
data

3 Types of Artificial Intelligence

AI applications in DOTs

- Autonomous Vehicles
- Traffic Management
- Predictive Maintenance
- Route Optimization
- Driver Assistance Systems
- Public Transportation Systems
- Logistics and Supply Chain Management
- Maritime Transport
- Safety and Surveillance
- Demand Forecasting
- Designs
- Customer Service and Experience
- Others

Most important things to consider when implementing AI applications

TRB_RIIM_Emerging Technologies survey on AI among TRB standing committees

25 TRB committees' representatives participated, covering diverse areas such as public transportation, pavement management, roadside maintenance, and infrastructure management.

The survey reflects varied perspectives on AI's role in transportation, influenced by each committee's specific focus area.

Committees Involved

AJE35	AME30
AJE45	AKC70
AKP50	ACP30
ACP25	AEP50
AMR50	AED80
AKR20	AP050
ACP35	AKR50
AP010	AKG70
AP025	AKG60
ACP20	AR070
	AKT50

Committees Response on AI Impact

Most committees report **minimal** impact from AI **currently (as of Jan 2025)**, indicating early stages of adoption or exploration. But they indicate a **substantial** influence in **future**

Committees Response on Frameworks/Resources

Only 3 committees have identified or developed frameworks/resources to address AI knowledge gaps.

The lack of existing resources suggests opportunities for shared learning and collaboration across committees.

AI Common Knowledge Gaps Identified

Data quality and
standardization

Ethical
considerations

Integration
challenges

Understanding of
AI technologies

Strategies to Bridge Knowledge Gaps

Education and Training:

- Organize tailored workshops and seminars for different expertise levels to enhance understanding of AI tools and applications.
- Develop online courses and certifications in AI in collaboration with universities and online platforms.

Research and Development:

- Foster partnerships with academic institutions and industry for joint research projects.
- Encourage pilot projects to test AI applications in real-world scenarios, such as traffic management or safety enhancements.

Frameworks and Guidelines:

- Develop guidelines for consistent data practices to improve AI model training and reliability.
- Establish ethical guidelines to ensure fairness and transparency in AI applications.

Strategies to Bridge Knowledge Gaps

Knowledge Sharing:

- Create online platforms for sharing AI insights, case studies, and best practices among committees.
- Document and analyze successful AI implementations to serve as references for other committees.

Investment in Technology:

- Provide committees with access to advanced AI tools and technologies for experimentation and learning.
- Secure funding for AI research and development initiatives to explore innovative solutions.

NJ AI ASSISTANT

Office of the Governor | Governor Murphy
Establishes State Artificial Intelligence Task
Force (nj.gov)

OCTOBER 10, 2023

 NJ AI Assistant

NJ AI Assistant

This is an internal generative artificial intelligence chatbot for use by NJ state employees and authorized parties, using the GPT-4o model.

Training Requirements: Before using the NJ AI Assistant, please begin the Responsible AI for Public Professionals training course. Access this course as [a State Learner](#) or [as an External Learner](#). If you have trouble accessing the course, please email clipelearning.support@csc.nj.gov.

Sensitive Information: In order to ensure responsible, safe AI use, please follow these [guidelines](#).

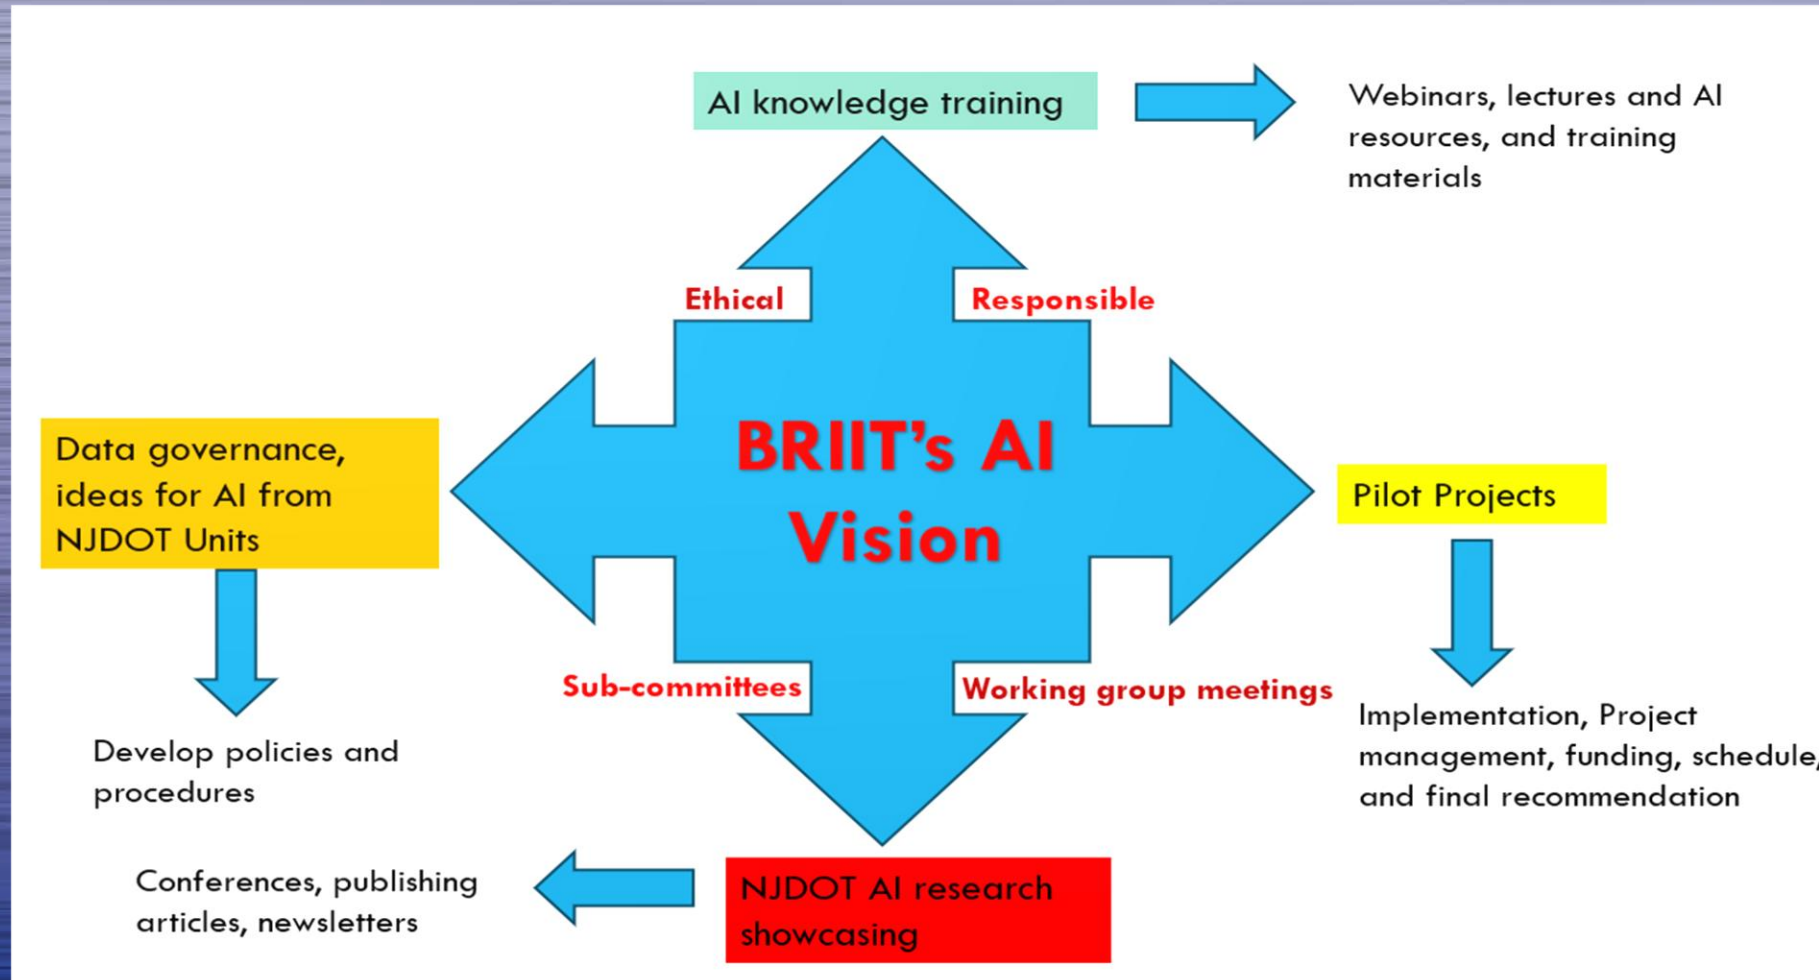

Newsletter: [Sign up](#) for the AI assistant newsletter to stay informed about upcoming and new features.

NJDOT-BRIIT-AI Working Group Key Activities

Systematic identification of use cases

Pilot research studies

AI knowledge sharing and training

Reporting (Internal and External)

Conclusions

- ❑ Sharing resources and developing AI frameworks' are essential for successful AI implementation
- ❑ Understanding the data is key
- ❑ Safe and ethical use of AI can promote productivity in workforce
- ❑ Research and pilot are key for full implementation of AI products

Artificial Intelligence in State DOTs

Peer Exchange

San Diego, CA | February 4-5, 2025

Final Report

Hosted by Caltrans

Peer Exchange Agenda

Day 1: February 4, 2025

- Welcome and Opening Remarks by Dara Wheeler, Chief, Division of Research, Innovation, and System Information, Caltrans and Marcie Kahbody, Agency Information Officer, California State Transportation Agency
- AI and Transportation Introduction Presentation by Diego Morales, AI Strategist, Delegata
- Overviews of States' AI Efforts by Participants
- Discussion: AI Governance and Strategy
- Discussion: Workforce AI Readiness and Adoption
- Discussion: AI Use Cases and Opportunities
- Summary of Day 1

Day 2: February 5, 2025

- Federal AI Transportation View Presentation by Vinn White, Former USDOT Chief AI Officer
- Update from FHWA
- Discussion: AI Transportation Pool Fund Proposal
- AI Risks and Security Introduction Presentation by Karl Kopper, Agency Information Security Officer, California State Transportation Agency
- Discussion: AI Ethics, Risks, and Security
- AI and Data Introduction Presentation by Chad Baker, Geospatial Data Officer, Caltrans and Caleb McCallister, Enterprise Data Manager, Caltrans
- Discussion: AI and Data Management
- Discussion: Takeaways and Calls to Action
- Closing Remarks

Peer Exchange Attendees

Participants

Roberto Barcena - TRB/NCHRP
Chad Baker - Caltrans
Ben Bressette - Caltrans
Tay Dam - FHWA - California Division
Jenni Hosey - Missouri DOT
Marcie Kahbody - CalSTA
Karl Kopper - CalSTA
Aubrey Lara - Delegata
Sally Mayer - Kansas DOT
Caleb McCallister - Caltrans
Ben McCulloch - Texas DOT

Amira Menoufy - Delegata
Diego Morales - Delegata
Jesse Newberry - Former Massachusetts DOT/HNTB
Emily Parkany - Vermont Agency of Transportation
Bhaskar Rudrakshala - Caltrans
Craig Thor - FHWA - Turner Fairbank Hwy Research Center
Gabiella Tsurutani - MNIT - Minnesota DOT
Giri Venkuteela - New Jersey DOT
Jennifer Volkening - Utah DOT
Russ Watts - Caltrans
Dara Wheeler - Caltrans
Enid White - Wyoming

Peer Exchange Insights and Key Takeaways

State	 AI Policy?	 AI Training?	 AI Officer?
California	Yes	Yes	In Progress
Kansas	Yes	Not Yet	Not Yet
Massachusetts	Yes	Not Yet	Not Yet
Minnesota	Yes	Yes	Not Yet
Missouri	Yes	In Progress	Not Yet
New Jersey	Yes	Yes	Not Yet
Texas	Yes	Yes	Not Yet
Utah	Yes	In Progress	Not Yet
Vermont	Yes	Not Yet	Yes
Wyoming	Yes	Not Yet	Not Yet

Peer Exchange Insights and Key Takeaways

- **AI as a Driver:** AI's buzz and popularity can be the motivating factor to get leadership to prioritize data reform efforts. Show leaders how AI depends on data governance.
- **Authority and Roles:** DOTs need a clear leadership role with real authority (a Chief Data and/or AI Officer) who can drive change. One single champion with business, data, and AI knowledge to bridge silos is needed.
- **Fail Fast / Learn Quickly:** It's okay to fail at pilot projects if you learn and adapt quickly.
- **Data Matters:** Data is crucial. Prioritizing data quality and management is essential for AI success.
- **Peer Collaboration is Key:** AI presents opportunities for multi-state partnerships, research, and shared lessons. More peer exchanges will help states learn from each other.
- **States Must Step Up:** Each DOT must increase its own efforts—no one else (including vendors) can do it for them. Agencies should take initiative and learn from successful AI implementations elsewhere.
- **Common Pace:** Many agencies are neither fully behind nor ahead, so they can learn from each other. In addition, avoid falling too far behind or advancing too quickly in AI implementation.

Peer Exchange Call to Action

- **Leveraging Existing Resources:** NCHRP, TRB committees, FHWA, AASHTO, etc. to glean and adapt best practices.
- **Central Repository:** Possibly create a collaborative platform to share AI/data references, resources, ongoing research, contacts, etc.
- **Develop Research Problem Statements:** Identify key areas for further study, focusing on high-priority AI/data topics.
- **Amplify Messages:** All participants should share lessons internally, to push for data readiness in AI contexts. Use AI's popularity to justify data quality improvements. Share success and failure stories and use storytelling to highlight lessons learned.
- **Transportation Pooled Fund:** Follow through on a TPF concept or study and explore forming an AI in Transportation working group.
- **Designate Leadership:** Assign decision-makers and dedicated staff with a unified vision aligning AI and data governance with organizational goals.
- **Continue the Discussion:** Organize another Peer Exchange to continue exploring and sharing AI considerations and advancements, including measuring performance and benefits.

Peer Exchange Survey Questions

Poll Results: Does your organization have an AI Strategy?

- 28% Yes
- 56% Working on it
- 17% Not yet

Poll Results: How would you rate your organization's AI literacy/awareness?

- 7% Highly aware
- 33% Generally aware but awaiting policy and training
- 60% Not yet engaged in enterprise-wide AI awareness

Poll Results: What are your main concerns regarding AI ethics, risk, and security?

1. Data Quality and Integrity
2. Bias and Misinformation
3. Data Security
4. Privacy
5. Transparency

Poll Results: Does your organization have an enterprise data policy?

- 60% Yes
- 30% In progress
- 10% Not yet

Poll Results: Does your organization have any use cases/proofs of concept currently in progress?

- 65% Yes
- 24% In progress
- 12% Not yet

Thank you
