Guardrails can make the difference between life and death. That’s why the Montana Department of Transportation (MDT) is replacing old guardrail along the Gallatin Canyon corridor in August.

Who: The Montana Department of Transportation.

What: Guardrail replacement in the Gallatin Canyon.

Where: U.S. Highway 191 between the Moose Creek Campground & Hellroaring Trailhead.

Why: Bringing life saving devices up to modern standards.

How: Traffic will be maintained throughout construction using single-lane closures weekdays between 7 AM - 7 PM. Delays of up to 15 minutes.

MDT recognizes US Highway 191 is a major commuter route between the Gallatin Valley and Big Sky. Lane closures during peak travel times may result in significant travel delays. Every effort will be made to limit work zone lengths and lane closures to off-peak hours to reduce inconveniences. We appreciate your patience.
