4. RIGHT OF WAY PHASE

takes place after the Montana Department of Transportation has a very clear footprint for what is needed to create the roadway and amenities to serve the community. Necessary property is acquired, permits are put in place, and final plans are scrutinized for accuracy during this phase.

5. CONSTRUCTION PHASE

includes contractor selection and public outreach to inform the community about traffic impacts.

6. COMPLETION!

Finally, Montanans get to enjoy an improved roadway, intersection, or bridge in their community. We all benefit from safer roads to move our families, food, fuel and other necessities across the state.
