The Montana Department of Transportation (MDT) is repairing and resurfacing five bridges between Bozeman and Livingston.

The bridge locations include:

- **Exit 316 over Trail Creek Road/ Chestnut Road** about 17 miles west of Livingston (eastbound and westbound bridges).
- **The US 89 – City Center Interchange (Exit 333)** on the south end of Livingston (eastbound and westbound bridges).
- **Swingley Road Bridge** on the northeast side of Livingston (eastbound bridge only).

Construction is anticipated to be completed in the fall.

During construction:

- Traffic will be reduced to one lane over the bridges to allow crews to safely and efficiently work on the bridges while keeping traffic moving.
- Speed limits will be reduced through each bridge work zone.
- Wide loads will be restricted (Visit [www.511mt.net](http://www.511mt.net) for the most up-to-date information).
- Work will take place during daylight hours, typically 6 a.m. – 10 p.m.
