

SECONDARY
324

**SOUTHWEST
OF GRANT**

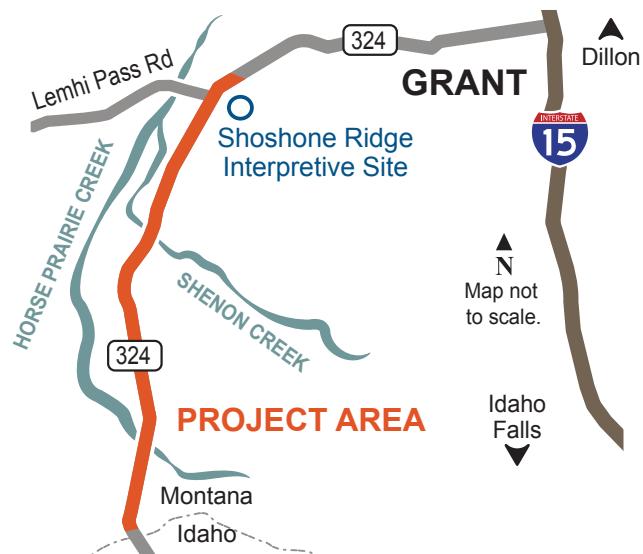

RURAL RECONSTRUCTION

The Montana Department of Transportation (MDT) is developing plans to improve approximately 13 miles of Secondary Highway 324 (S 324), beginning just north of Lemhi Pass Road, and extending south to the Montana/Idaho border. A construction year has not been selected and is dependent on project design completion and availability of funding.

The project will enhance safety features, improve traffic operations for motorists, upgrade drainage crossings, and extend the service life of the roadway.

Proposed improvements:

- The existing paved sections of the road will be milled and overlaid with new pavement.
- Gravel sections of the road will be reconstructed into a 24-foot-wide paved surface.
- Drainage features and culverts will be upgraded.
- New guardrail and fencing may be added.
- Snow fencing may be included at select locations.

THE PROCESS

MDT began the preliminary design phase of this project in summer 2025. Initial work includes gathering the preliminary field data and information necessary to develop preliminary design plans. The construction schedule is dependent on the completion of the project's design plans, acquisition of right of way, and the availability of funding. The schedule will be updated as the project develops.
