Moose in Fishercap Lake in Glacier National Park

While in the park, you may drive or hike, try a ride in a vintage touring motorbus, take a guided horseback ride, explore via bicycle or drive along the historic Going-to-the-Sun Road, for 50 miles of trails, through cedar groves or along high rocky ledges. Take the only route in the park that allows you to see the headwaters of the Clark Fork River.

You can explore Lewis and Clark Caverns State Park, the only large cave in the northern Rockies. You’ll see large stalagmites, columns and helictites. You can explore the caverns on a guided tour, as well as take in the fascinating displays and explore the park’s natural beauty.

The Last Chance Gulch Interpretive Center at Fort Peck Lake tells the story of the people who lived in the region and the events that shaped the area. You can hike through the center, view the displays and explore the site.

Be sure to visit the Charles M. Russell National Wildlife Refuge, which is the largest intact ecosystem in the Northern Great Plains. It is one of the largest national wildlife refuges in the world and is home to many species of wildlife. You can see prairie dogs, bison, antelope, deer, elk, and many other creatures in their natural habitat.
